UTAH IN REVIEW – 1991

After struggling throughout most of the 1980s, Utah state finances improved dramatically over the past three years. Not only was the state able to meet all of its legislative commitments in 1987–88, 1988–89, and 1989–90 without across–the–board budget reductions, but it also was able to conclude each of these years with sizable surpluses. Some of these surplus funds were used to provide tax cuts in 1988 and 1989. By contrast, Utah was forced to raise taxes in 1986–87, 1985–86, 1982–83, 1980–81, and 1979–80 in order to maintain a balanced budget for those years.

A major factor accounting for this improvement was a turnaround in the state's economy. Between 1987 and 1990, nonagricultural employment in Utah increased by 90,000 jobs, or an average of 30,000 jobs per year. By contrast, the average growth in nonagricultural employment between 1979 and 1987 amounted to about 11,400 jobs each year.

The national recession and other problems creates some uncertainties for the Utah economy in the period ahead. While it is expected that Utah will fare somewhat better than the nation as a whole, the growth in Utah this year probably will not be as robust as it has been in the past. In fact, the Legislative Fiscal Analyst reduced revenue projections for the 1991–92 fiscal year by $12 million and trimmed back the revenue estimates for the current 1990–91 fiscal year by $9.3 million from earlier forecasts. This necessitated some reductions in the Governor's budget recommendations.

Following the 1991 legislative session, the state received another financial blow when a district court judge ruled that the state must pay more than $137 million to retired federal employees to cover state income taxes collected during the years 1985 through 1989 plus interest and costs. Although this lower court decision has been appealed, it creates added financial uncertainty for Utah.

A tax cut initiative was presented to the Utah voters in 1990. This would have eliminated the sales tax on food sales and reduced state and local sales tax revenue in Utah by $110 to $115 million per year. The measure, however, was defeated by the voters in the 1990 general elections.

In July, 1990, the Utah State Supreme Court ruled that Utah cannot arbitrarily discriminate against one class of property simply because it is assessed by the state rather than by the county. In response to this court decision, the 1991 Utah Legislature enacted legislation which changed the way property is valued for tax purposes in Utah. While the effect of the new legislation will vary widely throughout the state, average property tax burdens probably will increase slightly on primary residential property, somewhat more on other locally–assessed real property, and decline for state–assessed and personal property (other than motor vehicles). Beginning in 1992, a uniform fee of 1.7% of market value will be placed on motor vehicles in lieu of the property tax.

The 1990 U.S. Census revealed that Utah's population increased from 1,461,037 in 1980 to 1,722,850 in 1990, a gain of 261,813 people, or 17.9%, over the ten–year period. Utah was listed as the ninth fastest growing state in the nation. All of this gain, however, was the result of natural increase (births over deaths). There actually was a net out–migration of about 30,000 persons from Utah during the 1980 to 1990 decade.

There are some signs that the out–migration of population from Utah is ending. An analysis of school enrollment trends in 1990 reveals that in–migration and out–migration in Utah last year nearly balanced out. Migration trends usually are a reflection of the availability of employment opportunities and economic prospects. Utah's strong economy in relation to that of the nation as a whole during recent years should serve as a magnet to attract new population to the state.

Another encouraging sign for the Utah economy is the growing recognition that Utah may be a good place to do business in the 1990s. A number of national magazine articles have cited the availability of a plentiful, high–quality and relatively low–cost labor supply along with sound government management practices as major reasons why companies are looking at Utah for possible expansion.

An analysis of consolidated state finances during the 1989–90 fiscal year shows that state revenue in Utah totaled $2,969,233,000 and state expenditures amounted to $2,847,729,000. This was the third consecutive year that state revenues were greater than state expenditures.

The general sales tax continues to be the largest single tax source in Utah, accounting for 37% of all state tax revenue and 24% of total revenue from all sources. The sales tax is followed closely by the individual income tax which produces about 22.2% of total revenue. The property tax also is a major revenue producer in Utah ($757 million in fiscal 1990), but all of the proceeds from the property tax are used to finance local governments in the state.

Approximately 83.5% of all state spending in Utah is for education, social services, and transportation. Education, of course, continues to be the number one area of state expenditures, accounting for 42.1% of all state outlays in 1989–90. In addition, there are education expenditures from locally–raised taxes, expenditures for capital projects at the educational institutions, and spending from special restricted funds at the Utah colleges and universities.

Utah's fiscal capacity (ability to raise revenue from various sources) is about 24% below the U.S. average. Because Utah's revenue raising potential is so much below that of other states, it has been forced to make a greater than average taxing effort to support essential state and local services. The overall revenue effort in Utah is 9% greater than the U.S. average and 13% higher than the Mountain States average.

A recent nationwide study reveals that the overall state and local tax burden in Utah is between 8% to 12% above the U.S. average at various income levels. Utah ranked 17th highest among the states at the $25,000 income level, 16th highest at the $50,000 income level, and 19th highest at both the $75,000 and $100,000 income levels.

Utah's state and local tax burden is roughly proportional at income levels between $10,000 and $100,000, but then declines slightly at income levels above $100,000. When federal taxes are included, the total tax burden in Utah at the higher income levels is substantially greater than it is at the lower income levels. Families with incomes above $250,000 pay about 33.5% of their income for federal, state, and local taxes, while families with incomes between $15,000 and $20,000 per year have an average tax burden of about 15.2%.

NOTE: Above schedule does not include value of "fringe benefits". It does show the compensation plan for classified state employees, executive employees, professional employees, and exempt positions. Separate pay plans cover data processing and trade and craft positions.

* After 1979–80 grades 1–4 were eliminated from the classified pay plan.

** Not included are about 277 trade and craft employees, 458 data programming personnel, and about 51 "executive" individuals such as, elected positions, some state-wide water district personnel, instructors, and legislative session workers, who have no grade.

Prepared by **UTAH FOUNDATION** from salary schedules obtained from the Utah Division of Personnel Management.

NOTE: Above figures are based on the sales tax revenues that are allocated to local units during the fiscal year ended June 30, 1990. Since there is a delay in remitting sales tax collections to the State Tax Commission, the data actually reflects business operations during the 12 month period ended March 31, 1990. Sales tax allocations to local units are amounts distributed after deduction of administrative expenses by the State Tax Commission. Gross taxable sales includes or reflects use tax collections as well as sales tax collections.

* Excludes expenditures for administration and for social services.

** Beginning in January, 1974, money payments for old-age assistance, aid to the blind, and aid to the disabled were paid directly by the Federal Social Security Office.

Prior to fiscal 1962, medical assistance expenditures are not shown separately. Such medical expenditures are included in program expenditures for these earlier years.

Prepared by **UTAH FOUNDATION** from reports of the Utah Department of Social Services and Utah Department of Health.

* Individual categories add to more than the total because some persons were receiving assistance under more than one program.

** Does not include old-age recipients, blind recipients, and disabled recipients who were receiving money payments through the Federal supplemental security income program. These adult assistance categories were transferred to the Federal Social Security office on January 1, 1974.

Cases eligible for medical assistance only.

NOTE: Beginning in 1986, property in Utah (with certain exceptions) was assessed at 100% of its "reasonable fair cash value." Values for earlier years were revised by Utah Foundation in order to be comparable with the 1986 changes.

* Includes state property taxes levied for school purposes until 1973.
** Prior to 1953 special district taxes were included with municipal taxes.

Prepared by **UTAH FOUNDATION** based upon TC-233A (interim) reports from each county submitted to the Utah State Tax Commission.

NOTE: Beginning in 1986, property in Utah (with certain exceptions) was assessed at 100% of its "reasonable fair cash value." Tax rates also were adjusted to reflect a percentage of full value. In the above table, tax rates for earlier years were revised by Utah Foundation in order to be comparable with the 1986 changes.

* Average total rate of all special districts in those areas having such districts.
** Prior to 1953 special district rates were included with municipal rates.

Prepared by **UTAH FOUNDATION** based upon TC-233A (interim) reports from each county submitted to the Utah State Tax Commission.
